Exp services Inc. (formerly Trow Associates Inc.)

Founded in 1957 and celebrating 50 years of service, exp Services Inc. provides qualified inspection and advanced field and laboratory testing methods in all activities. From geotechnical analysis, to evaluation, specification and quality control of construction materials in accordance with established codes and standards. Our aim is to combine advanced technologies with hands-on experience to tailor our services to the routine or unique requirements of each project.

ASPHALT TECHNOLOGY

- Full CCIL Type A, B, E and F certified hot-mix asphalt testing
- SUPERPAVE PGAC asphalt (including dent and extended BBR testing), emulsion and cutback testing
- Expanded Asphalt Mix Designs
- SUPERPAVE Asphalt Mix Performance Testing (AMPT)
- Quality control and Quality Assurance Testing
- Conventional, Recycled, SMA and SUPERPAVE Mix Design and Mix Verifications
- FWD/HWD Pavement Deflection Testing
- MTO Road Profiling (High Speed and California Style)
- Pavement Design and Evaluation
- Forensic Engineering
- Pavement Management System and Data Collection
- Research and Product Development
- Referee Testing

CONCRETE TECHNOLOGY

- CSA and ACI certified concrete testing
- Compressive strength testing for normal and HPC concrete
- Rapid chloride permeability test
- Rapid freeze-thaw testing
- Concrete Mix design
- Evaluation of concrete admixture
- Alkali aggregate testing
- Precast plant simulations for high early strength monitoring
- Chemical admixture testing
- Curing compound testing
- Evaluation of concrete patching materials, grouts and epoxies

AGGREGATE AND SOIL TESTING

- Fully certified Type C and D Aggregate Testing and Superpave Consensus Properties capabilities
- Full range of asphalt, concrete and granular testing
- Triaxial Testing
- Consolidation Testing
- Direct Shear Testing
- Hydraulic Conductivity Testing

BUILDING SCIENCE TESTING TECHNOLOGY

- Window and Curtain Wall Testing
- Façade evaluation and testing
- Forensic Investigations
