Clifton Associates Ltd. is a Saskatchewan based consulting engineering firm that provides leading edge scientific and technical engineering services. Our core skills are related to the earth sciences, civil and environment. We provide technical solutions to clients primarily in the oil and gas, transportation, mining, industrial, public works, construction, government and international sectors.

Our company was formed in 1978 with two offices in Saskatchewan. It has since grown to a total staff exceeding 200, with offices throughout western Canada. Our staff includes engineers, geoscientists, technicians, technologists and support staff. Clifton Associates Ltd. has over 35 years experience in consulting engineering in Canada with strong international experience.

Clifton Associates Ltd. places a high value on safety and has developed an active safety program. We have Certificates of Recognition from construction associations in Saskatchewan and Alberta, are registered with ISNetwork, and our Laboratories are CCIL certified.
