## Independent and Expert Testing for the World

Our international testing business serves local markets within a wide range of industries including:

- Aerospace
- Automotive & Transportation
- Construction
- Defense
- Environmental
- Food & Consumer Products
- Metallurgy & General Engineering
- Oil & Gas
- Pharmaceuticals
- Power Generation & Renewables

With almost 4,500 colleagues in 32 countries, Exova is a connected world of expertise. Our testing and advisory capabilities, including materials and structures; fire safety; calibration; chemistry and microbiology, are trusted by customers worldwide. When your reputation is never far from the spotlight, it is the silence of our results that is the measure of success.

With 18 labs and a network of depots across Canada, we are your lab, wherever your work takes you.

## Exova specializes in the following:

- Advising and Consulting
- Certification
- Chemistry and Microbiology
- Consumer Products Testing
- Engineering and Technology
- Materials Testing
- Medical gases / Compressed Air Certification
- Stack Sampling
- Toxicology and Asbestos Testing

## Our Approach

Throughout North America, Europe, the Middle East and Asia/Asia Pacific, we provide nationally and internationally recognized standard testing through an expansive network of laboratories and testing facilities located close to the industries they serve.

Our network allows us to transfer knowledge and deliver global best practice locally. Our collaborative approach helps to advance collective learning and pushes the limits of what can be achieved for our customers in each and every location.
