

As the market leader in analytical services & solutions to the energy, environmental, food and DNA industries, Maxxam Analytics has been committed to contributing to our customers' success through the application of our knowledge and expertise for over 40 years. In 2012, our 2400 employees combined efficiency and customer service with rigorous science and quality management to process over 2.3 million samples and generate 41 million results. Our commitment to success with responsibility was rewarded with a *Canada's 10 Most Admired Corporate Cultures™* award and a *Toronto Star Award for Excellence in Workplace Integration*.

Environmental Services (maxxam.ca/enviro) With the most extensive network of laboratories and service centres throughout Canada, Maxxam provides comprehensive environmental analysis for soil, water and air contaminants. The data collected helps customers comply with environmental regulations and standards that protect human health and the natural environment.

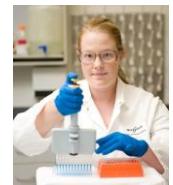

Becquerel Laboratories – A Maxxam Company (becquerellabs.com) Becquerel Laboratories is a global leader in neutron activation analysis and radiological testing. Becquerel's expert analyses are typically requested by government regulators and environmental consultants to help measure trace levels of radioactive contamination that may be present in soil, water or sediment. Becquerel also serves the manufacturing, mining and product testing industries to help determine the trace elements in raw materials and finished products.

Petroleum Services (maxxam.ca/petroleum) Maxxam creates value for the Oil & Gas Industry by delivering the most comprehensive range of analytical services that address key business objectives from productivity to regulatory compliance. We are the scientific leaders in gas analysis and oil sands solutions – from setting up onsite laboratories to tailings management services. Customers leverage Maxxam's technical expertise to optimize their operational processes and to design customized solutions that serve the emerging needs of the industry.

Food Science & Safety Services (maxxam.ca/food) Maxxam offers a wide range of analytical services to verify the quality, safety, reputation and regulatory compliance of food operations. Areas of expertise include: microbiology, residue, food chemistry and nutritional labelling. We use unparalleled expertise in conventional and rapid microbiology methods to help our customers fulfill regulatory requirements, address operational challenges, and bring safe, quality food to market.

Forensic/DNA & Product Testing Services (maxxam.ca/dna) As the leading private forensic lab in Canada, Maxxam offers DNA analysis for forensic biology, paternity, immigration and pure-bred livestock applications. The business is also recognized internationally as expert in the detection of drugs in biological fluids serving the Horse Racing market. Maxxam's Product Testing group provides services such as: trace impurities determination, extractable/leachable studies and USP elemental analysis to pharmaceutical and agrochemical manufacturers.

At Maxxam, data integrity and quality are clear priorities. Our Quality Program is designed to comply with or exceed the data quality objectives of the industry, Canadian Regulators, U.S. EPA and the International Standards Organization (ISO/IEC 17025). Our stringent quality adherence strategy is supported through participation in many relevant national and international accreditation programs, licensing by government bodies and proficiency testing and double blind check sample programs.
