GEM Testing is a locally owned Geotechnical and Material engineering and testing firm located in Medicine Hat, Alberta. GEM Testing currently has a staff of 3, which consists of a professional engineer senior technician and intermediate technician. The 3 employees have over 30 years of combined experience in geotechnical, materials and environmental engineering and testing services and activities. The focus of these activities include; Geotechnical Investigations, Project Management, Materials Engineering and Testing including being involved with residential development, commercial buildings, utility construction, water and sewage reservoirs, retention ponds, slope stability analysis, airport and runway construction, roadway and parking lot evaluations, concrete and asphalt mix designs and foundation inspections/evaluations and design. Endeavours such as these entail co-operative and responsive, technical project liaisons between owners, architects, prime engineering consultants and contractors. All employees are CCIL certified and have been trained in WHIMS, TDG and radiation safety.

- Lab equipment is less than five years old and Lab and technician are CSA (CCIL) certified.
- Hold a Valid Canadian Nuclear Safety Commission Licence.
- Certified SECOR (Small Employer Certificate of Recognition) with the Alberta Construction Safety Association.
- Association of Professional Engineers, Geologists and Geophysicists of Alberta
- Association of Professional Engineers and Geologists of Saskatchewan
